

Stellar Navigator Press Kit Copy

One-Sentence Pitch

Stellar Navigator is a sci-fi cartography and world building tool that helps creators develop galaxies with individual solar systems and provide each with rich detail, history, and visual styles.

Short Description

Stellar Navigator is an interactive tool for building and exploring custom galaxies and solar systems. Designed for world builders, game masters, writers, and sci-fi creators. Whether you are running a space based table top campaign and need a place to track the worlds your players visit, want to visually share the universe you created for them to play in, or want to track your observations of our night sky and imagine what could be out there, Stellar Navigator has you covered!

Stellar Navigator provides a unique toolset which allows you to build your dream galaxy and all the solar systems therein. You choose how to light up the night sky!

Medium Description

Stellar Navigator is a galaxy-building and navigation tool designed for creators who need more than a static star map. Users can build custom stellar regions, create and manage star systems that grow with their story.

Whether used for a tabletop campaign, a sci-fi writing project, a game setting, or personal world building, Stellar Navigator gives creators a practical way to organize complex interstellar information while keeping the map visually readable and easy to update.

Long Description

Stellar Navigator is a desktop galaxy-mapping tool built for creators working with large sci-fi settings, fictional star charts, and interconnected worlds.

At its core, Stellar Navigator allows users to create and organize star systems across a visual galactic map.

The tool is designed for practical world building. Rather than forcing creators to manage their setting entirely through spreadsheets, disconnected notes, or static images, Stellar Navigator brings that information into an interactive medium where story meets visually stunning imagery.

This makes it especially useful for tabletop campaigns, science fiction writing, collaborative lore development, and custom campaign settings.

Stellar Navigator is intended for people who want to build fictional galaxies with structure, clarity, and room to grow. It gives creators a central place to map the stars and keep their setting organized as it expands.

Key Features

Interactive Galaxy Mapping

Create, edit, and organize star systems across a visual galaxy map. Stellar Navigator is designed to make large-scale setting design easier to understand immediately.

Custom Star Systems

Build out individual star systems with relevant information, labels, and supporting details for use in campaigns, writing projects, or custom sci-fi settings.

Import and Export Support

Work with structured map data so projects can be saved, updated, backed up, and shared more easily.

Built for World builders

Stellar Navigator is designed for creators who need to manage fictional settings with many moving parts: systems, routes, factions, regions, and evolving lore.

Suggested Tagline Options

- **Map the stars. Organize the galaxy. Build the setting.**
- **A galaxy-mapping tool for creators, world builders, and storytellers.**
- **Turn your sci-fi setting into an interactive star map.**
- **For creators whose worlds are bigger than one planet.**

Fact Sheet

Name:	Stellar Navigator
Type:	Desktop galaxy-mapping and world building tool
Developer:	Cathexis Digital Design
Platform:	Windows
Release Date:	Early Access 28 Mar, 2025
Price:	\$20.00 CAD
Website:	
Store Page:	https://www.stellar-navigator.com/
Press Contact:	Chris Newbery support@stellar-navigator.com
Social Links:	<ul style="list-style-type: none">• https://x.com/StellarNav• https://www.facebook.com/profile.php?id=61560888882405• https://www.youtube.com/@StellarNavigator-j2g
Availability	Available now.

Audience

Stellar Navigator is designed for:

- World builders
- Tabletop game masters
- Science fiction writers
- Lore creators
- Campaign planners
- Collaborative storytelling groups
- Fans of fictional star maps and galactic settings

What Makes Stellar Navigator Different

Many world building tools focus on fantasy whereas there are few if any that provide the same level of tooling for science fiction settings. That's where Stellar Navigator stands out. Moreover, it brings a hand-crafted universe to the table for TTRPG game masters and allows collaboration and shared story telling within on platform.

FAQ

What is Stellar Navigator?

Stellar Navigator is a desktop galaxy-mapping and world building tool that lets users create star systems, organize regions and factions, draw connections between worlds, and manage large-scale sci-fi setting information.

Who is Stellar Navigator for?

Stellar Navigator is designed for world builders, tabletop game masters, writers, and anyone creating a fictional galaxy or sci-fi setting.

Is Stellar Navigator a game?

Stellar Navigator is primarily a creative tool rather than a traditional game. It is designed to help users build, visualize, and manage fictional galaxies.

What can I create with it?

Users can create custom galaxy maps and populate them with unique solar systems spread across the breadth of one or many galaxies.

Can I use it for tabletop campaigns?

Yes. Stellar Navigator is well suited for tabletop campaigns where a game master needs to organize planets, systems, and campaign locations across a larger stellar region.

Can I use it for writing or world building?

Yes. Stellar Navigator is designed to help writers and world builders keep track of fictional places, their relationships, and the larger structure of a sci-fi setting.

Can projects be shared?

Stellar Navigator is designed with structured project data and upcoming Steam Workshop support, allowing users to share and import galaxy projects.

Where can people get Stellar Navigator?

Stellar Navigator is available through Steam. More information can be found at https://store.steampowered.com/app/3359980/Stellar_Navigator/.

Review and Coverage Notes
